Hanamagouda Goudar

Full Stack Developer

[GitHub](#) | [Portfolio](#)

Dear Sir/Madam,

I am writing to express my keen interest in the role. With 1.4 years of hands-on experience as a Full Stack Developer currently working at Tata Consumer Products Limited (via Mynd Solutions) in Bangalore, I bring a strong foundation in web development, a diverse tech stack, and a passion for building scalable, user-centric applications.

At Tata Consumer Products, I have had the opportunity to contribute to multiple enterprise-grade applications. My primary work has been on the **Tea Procurement System**, where I developed end-to-end features for managing offers, purchases, and payments. I also contributed to applications for **Tata Foods BU** and **Packing Material Cost Modelling**, where I ensured business rule alignment and performance optimization. Working in an agile, cross-functional team, I have gained practical exposure to tools and technologies such as **Node.js, React.js, PostgreSQL, Swagger, Postman**, and **AWS services (EC2, S3)**.

My approach combines solid backend logic with intuitive frontend interfaces, backed by my training in full stack engineering from NIIT StackRoute and certifications in Java, SQL, and JavaScript from HackerRank. Additionally, I am familiar with **microservices architecture, JWT authentication**, and tools like Docker and Git for DevOps tasks.

While my official notice period is 45 days, I am open to an early release upon discussion with my current employer, ensuring a smooth and timely transition if selected.

I am enthusiastic about joining a forward-thinking team where I can contribute meaningfully while continuing to grow as a developer. I would welcome the opportunity to discuss how my skills and experiences align with your goals.

Thank you for considering my application. I look forward to the opportunity to speak further.

Sincerely,

Hanamagouda Goudar
